Introduction: What Are We Talking About?

- What do we all mean when we say PK20W+?
- At the highest level we all understand that we are talking about individuals from the time they are students in early childhood programs, through elementary, secondary, post secondary and into the workforce and beyond.
- What does it mean from a systems and data perspective?

PK20W+: The Business Case

PK20W+: What Does It Mean?

- How are these “horizontals” different from each other?
- How are the transitions between one stage in a life-long learner’s journey to another different?
- What do we need to be responsible for in supporting that?

Panelist Discussion

- All of us come to this concept from different places in the learner lifecycle with different perspectives, experiences and expectations about learners/employees and learner/employee data.
- This discussion will present these varying viewpoints and help us all gain better perspectives on what a truly interoperable PK20W+ learner lifecycle might look like and what some of the obstacles may be.

Open Discussion and Q&A

Audience questions and statements with panelists having an opportunity to engage.

Final Comments

- Speed Round: Each Panelist gets one minute to speak to what was discussed and what they heard.
- Transition to Privacy in the pK20W+ space
