

Strengthening The Circle

The Interoperability of People

SESSION PRESENTERS

**Katherine
Warren**

Maine DOE
Data Manager

**Alexandra
Cookson**

Maine DOE
Data Quality
Trainer

The Journey

Is the path clear? No.

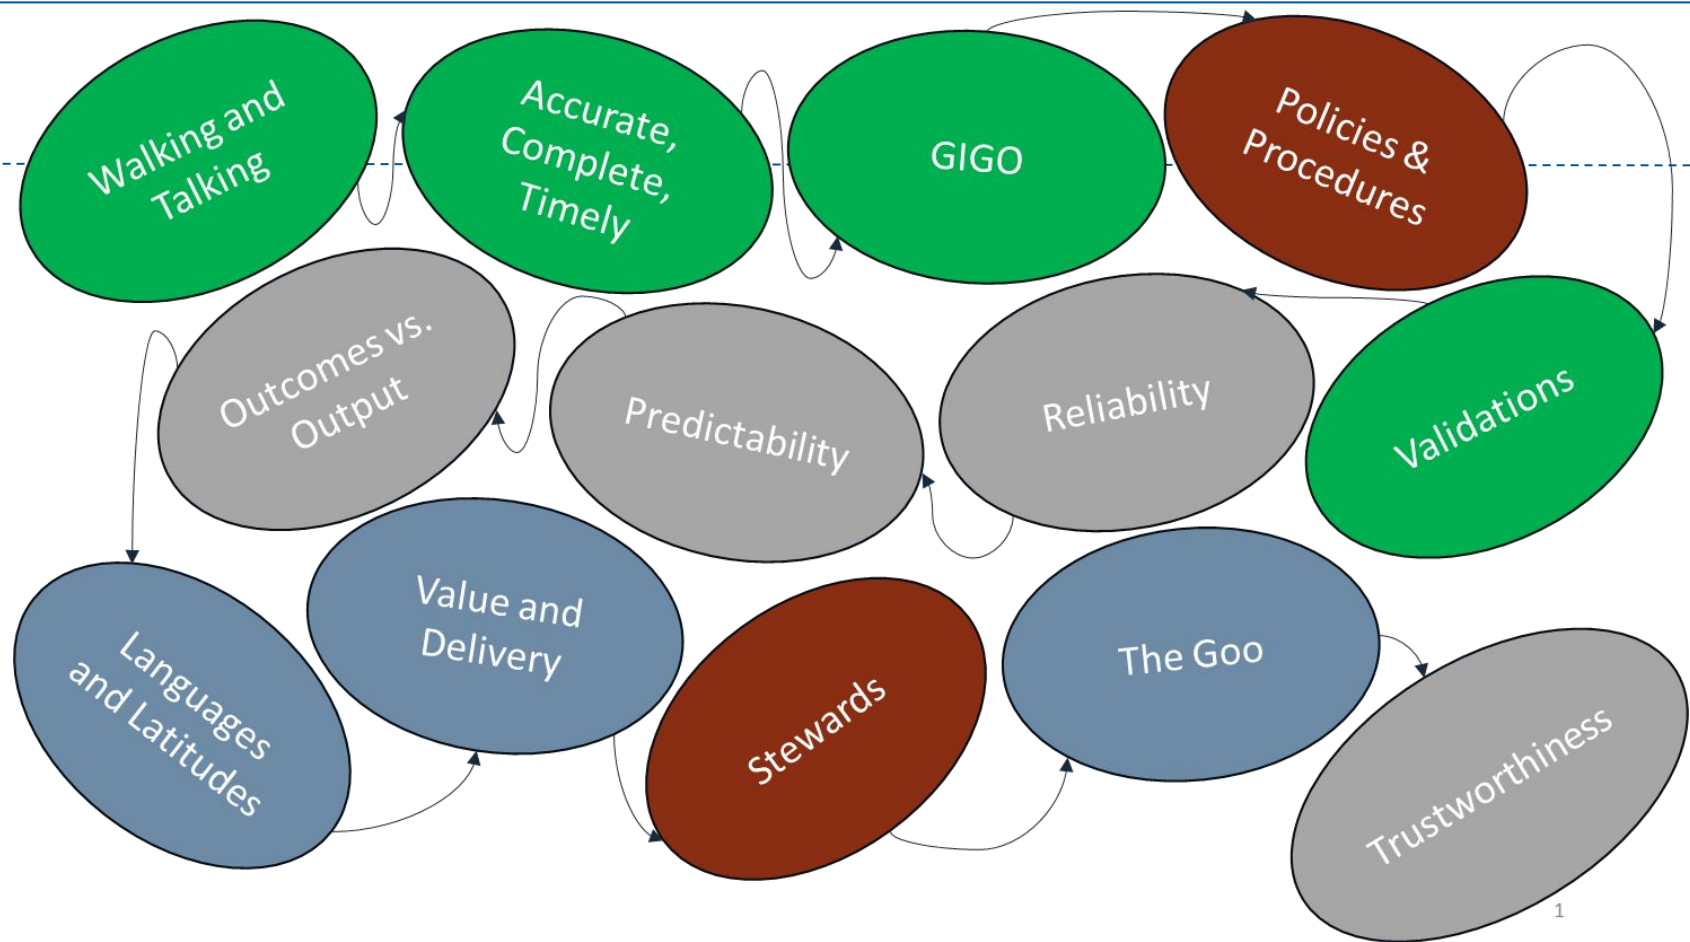

Is it hard? Yes.

Is it turbulent? Yes.

Is it chaotic? Yes.

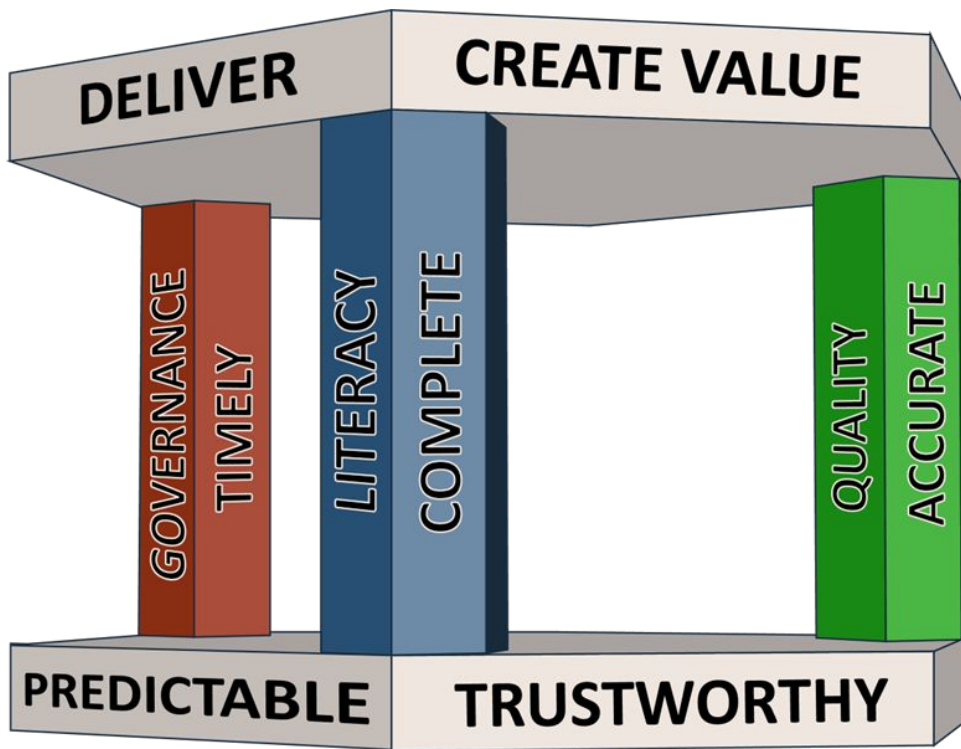

Do we have it all figured out? No.

Have we learned things and made measurable progress? Yes.

Introduction to the Framework

Trustworthiness is our foundation.
Creating Value is our purpose
Accurate, Complete, and Timely are our values
Quality, Literacy, and Governance are the pillars of our practice
Our **enabling practices** are the way we do our work
Together, these form the **Interoperability of People Framework**

The gap between
adopting and
implementing is
people.

Implementing

The focus is on the system/product.

Customer needs and value can sometimes take a back seat to technology.

Conversations center around business rules, features and functional requirements, timelines etc .

Involves executing planned activities to achieve specific goals or objectives, often turning concepts or designs into reality

Adopting

Transition of processes and full integration of a solution to meet needs and create value that customers recognize.

People are empowered that they have a role and a voice.

Self-reinforcing positive feedback.

Adoption often requires addressing challenges such as training, integration, and cultural alignment to ensure widespread & effective use/

CALL TO ACTION

Useful links / next steps:

How to get started ?

Assume best intentions - the number of people trying to do a bad job is very small - what don't you understand about their context ?

Be honest & humble - Everyone you will encounter has something to teach you. Arrive with Beginner's Mind.

What does the Interoperability of People look like in your world ?

Q & A

Content Management Strategy - Resources

Glossary - The vocabulary of our work

Data Dictionary

Business Rules

Calendar

Data Set Inventory

Data Product Profiles - metadata, data flows

Program Partnership Plans - product ownership
