CTO

Starter Questions

Remember, we have an hour and a half!

In one sentence: what problem were you trying to solve that made Unity worth adopting?

What was the moment you went from “interested” to “we’re doing this”?

What's your best “before and after” story—what changed once Unity was in the picture?

What did “interoperability and privacy built-in” mean for you in practical terms?

Q&A or Backup Questions

Remember, we have an hour and a half!

What's one early outcome you can point to (speed, reliability, fewer handoffs, better data quality, easier compliance, improved trust)?

What does success look like 6–12 months from now—what signal will tell you it's working?

If an organization wants to start in the next 90 days, what's the best first step you'd recommend?

What's one *misconception* about Unity you'd like to correct for newcomers?

Social Networking Reception

from 5.30pm
Verandah Grill (Sun Deck)
